

Tactivo for iPhone 7 coming Q1 2018. Price is YTBD but expect around \$149 USD.
Please contact me to pre-order @ jeff.scott@identos.com

As you might have seen in our press release. Identos has entered an agreement to acquire the business unit "Tactivo" as of January 1st 2018 from Precise Biometric, AB.

IDENTOS is a German/Canadian company with offices in Munich and Toronto. See more at identos.com/identos-tactivo-transition/

The company provides **encryption technology** and services for **protecting mobile data** together with an **encryption key management** platform providing **digital identity management (derived credentials)** in **high assurance and compliance-based** industries.

Along with IDENTOS software offering the company also has an existing portfolio of **smart card readers** complementing the **Tactivo product line**. IDENTOS thereby has extensive knowledge of the market and the technology as such and are well equipped to take over the Tactivo Business.

I am confident this agreement between Precise Biometric and Identos will be beneficial to our existing customers and partners by ensuring further investments in the products, and provide an opportunity to expand the Tactivo product line with additional encryption software solutions.

Highlights

- Tactivo for iPhone 7
- Encryption as a Service
- Secure Messaging
- Derived credentials
